78%

What You Will Learn

Part 03

Minor in APSY

The Interdisciplinary Edge

A Minor in Applied Psychology provides rigorous thinking skills and a deep understanding of human behavior, enabling deeper introspection and enhanced performance across all your fields of study.

With a Minor in Psychology, You Will:

- Master core psychological principles and methods
- Analyze the drivers behind cognition, emotion, and behavior
- Decode complex social phenomena through a scientific lens
- Enhance emotional intelligence for personal and professional growth
- Navigate and resolve interpersonal conflicts effectively

Minor in CST

Why minor in CST?

- ❖ Elevate your skills from software use to advanced learning and research.
- ❖ Become a sought-after interdisciplinary talent.

With a Minor in CST, You Will:

- Build functional software applications
- Acquire practical data analytics skills
- Master cutting-edge IT advancements
- Collaborate effectively with engineering teams
- Gain foundational skills to launch an IT venture

Minor in ESM

Why This Matters:

- ✓ **A Global Priority:** On national and international agendas.
- ✓ **An Industry Trend:** Central to business now and in the future.
- ✓ **Future-Proof Your Career:** Widens career and postgraduate options.

With a Minor in ESM, YOU WILL:

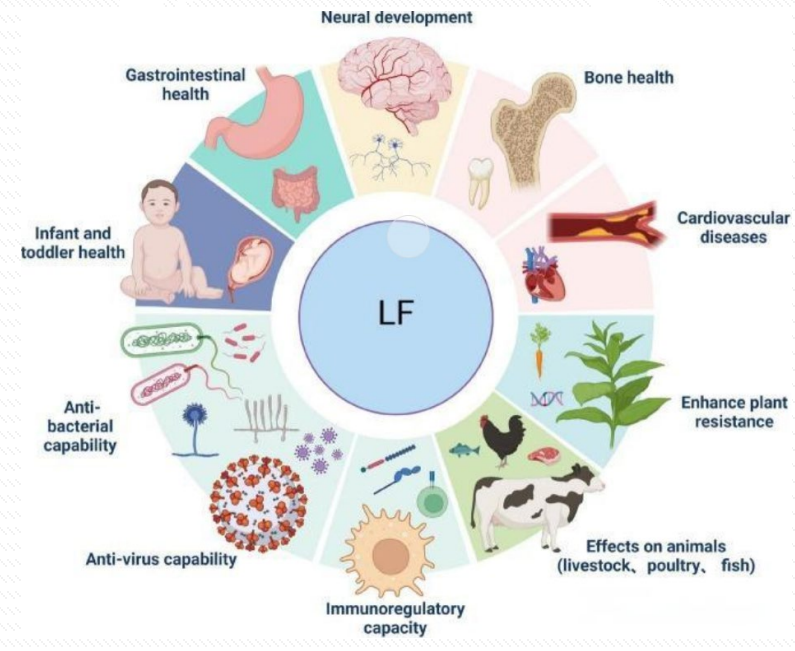

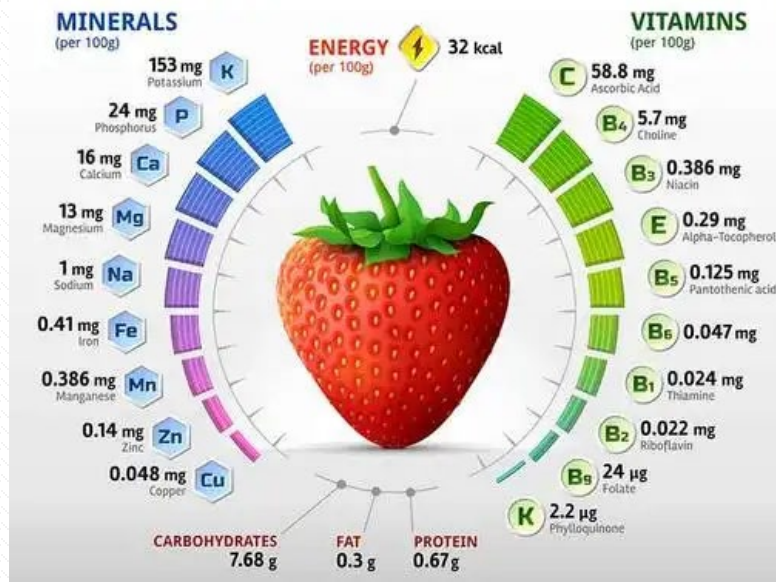

- **Acquire** a robust foundation in sustainable development practices.
- **Gain** the toolkit to implement sustainable strategies in any industry.
- **Develop** a holistic, interdisciplinary mindset for managing complex environmental issues.

Minor in NGH

What You Will Gain:

- ✓ Global Awareness of critical health challenges.
- ✓ Strategic Skills in nutrition and health.
- ✓ Career Readiness for the healthcare and wellness sectors.

Programme Requirements

Part 04
